WEBINAR DESCRIPTION

This special webinar is designed to educate patients about CAR T-cell therapy for non-Hodgkin lymphoma. Participants will learn about what is important in a diagnosis of non-Hodgkin lymphoma, key factors in treatment decision-making and what side effects may be encountered. Led by nationally renowned medical oncologist Dr Neil Love, this medical webinar is designed to provide accessible information for patients and their friends or family members.

ASK THE FACULTY

Submit your own questions for the faculty to address during the live webcast.

KEY TAKEAWAYS

- Understand how CAR T-cell therapy works and what the treatment experience is like for patients
- Learn about available CAR T-cell therapy options for non-Hodgkin lymphoma
- Know about potential side effects of CAR T-cell therapy and what is done to prevent and manage them
- Contribute to shared decision-making between patients and their healthcare providers
