To: Members of the Ohio House Health Committee  
Re: HB 248-11

Dear Ohio House Health Committee,

As organizations representing 1.7 million+ Ohioans, we are gravely concerned by HB 248-11, legislation that puts ALL Ohioans, including children, at risk. Among us are physicians, nurses, health commissioners, hospitals and business owners, who feel moved to firmly voice our shared concerns. At its core, this proposal would destroy our current public health framework that prevents outbreaks of potentially lethal diseases, threaten the stability of our economy as it recovers from a devastating pandemic, and jeopardize the way we live, learn, work and celebrate life.

The legislature has heard that this bill’s purpose is to prevent the COVID-19 vaccine from becoming mandatory, but HB 248-11 applies to ALL immunizations, including childhood vaccines. If passed, this legislation has the potential to reverse decades of immunity from life-threatening, but vaccine-preventable diseases such as measles, mumps, hepatitis, meningitis and polio. In fact, the words “COVID-19” or “coronavirus” are not found anywhere in the bill.

PROCEED TO NEXT PAGE
This legislation would also take away the rights of individuals who have businesses in Ohio to implement important safety measures meant to protect their employees, clients, and others. Many businesses have seen enormous fallout as a result of the pandemic and are working to rebuild and move forward. Business owners should each retain the right to carefully evaluate the unique circumstances they face and make their own determinations about what is best for keeping the workplace healthy and their overall recovery.

As current Ohio law allows for school immunization exemptions to decline vaccinations for medical, religious, or reasons of conscience (known as the philosophical exemption), and most businesses allow for flexibility in regard to vaccinations, we question the need for HB 248-11. This overly broad proposal would further strip away accountability and compassion for our fellow Ohioans, and cause severe disruption to our state’s health, economy, and way of life. It is our urgent plea that HB 248-11 be rejected, to protect the vitality of Ohio’s children and families and avoid disastrous consequences for the future of our state.

Respectfully,
