The Honorable Ron Wyden Chairman Committee on Finance United States Senate Washington, DC 20510

The Honorable Mike Crapo Ranking Member Committee on Finance United States Senate Washington, DC 20510 The Honorable Richard Neal Chairman Committee on Ways and Means U.S. House of Representatives Washington, DC 20515

The Honorable Kevin Brady Ranking Member Committee on Ways and Means U.S. House of Representatives Washington, DC 20515

Dear Chairman Wyden, Ranking Member Crapo, Chairman Neal and Ranking Member Brady:

Thank you for your ongoing leadership to expand access to virtual care. As you know, virtual care and telehealth have been lifelines for millions of Americans throughout the COVID-19 pandemic and will continue to be essential tools to ensure access to quality health care even once the pandemic ends. We write today to encourage you to reinstate the recently expired, bipartisan policy changes that allowed 32 million Americans in the employer market with high-deductible health plans coupled with Health Savings Accounts (HDHP-HSAs) to receive telehealth benefits from their employer or health plan pre-deductible.

As you know, this flexibility unfortunately expired on December 31, 2021. Given the ongoing pandemic and recent surge in variants of concern including Omicron, as well as the related behavioral health and chronic disease management challenges, it is critical that Congress reinstate this flexibility so that millions of Americans can once again access these lifesaving telehealth services.

Americans with HDHP-HSAs must meet minimum deductibles defined in statute before the cost of telehealth can be covered by their employer or health plan. Congress took swift bipartisan action as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020 (P.L. 116-136) to ensure that more workers could receive covered telehealth services by allowing employers and health plans to provide pre-deductible coverage for such services. This commonsense policy helped ensure that families could access vital telehealth services – including virtual primary care and behavioral health services – prior to having to meet their deductible. In fact, according to a <u>survey</u> by the Employee Benefit Research Institute (EBRI), about 96 percent of employers adopted pre-deductible coverage for telehealth services as a result of this provision.

The ability to offer pre-deductible telehealth services for employees is a meaningful expansion of health care access for 32 million Americans. Notably, according to unpublished estimates from EBRI, over 50 percent of individuals with an HSA live in zip codes where the median income is below \$75,000 annually. Reaching the deductible threshold of at least \$1,400 for an individual and \$2,800 for a family can be a financial strain. The CARES Act flexibility enabled important expansions of access to care during the pandemic for individuals who may otherwise have neglected essential care due to out-of-pocket costs.

The undersigned organizations strongly urge you to retroactively reinstate this vital telehealth provision from the CARES Act via the next possible legislative vehicle. This is especially important given plan year 2022 has already begun and millions of individuals have already selected this form of coverage. There is

also bipartisan, bicameral legislation before your committees to extend this flexibility. As the pandemic continues, particularly in light of the surge in cases due to the Delta and Omicron variants, individuals need continued access to these vital services. We strongly encourage you to reinstate this important provision as soon as possible to ensure Americans can access the telehealth coverage and virtual care they need.

Thank you for your consideration of this important request.

Sincerely,

Conveners
