

Questions to Ask Your Doctor After Biomarker Testing

CANCER CHANGES EVERYTHING. CANCERCARE® CAN HELP.

After biomarker testing, your health care team may have more information about your cancer and treatment options. The following questions can help guide your discussion about the results and what they mean for you. For general, basic information about biomarkers, please visit www.cancercare.org/biomarkers.

What does the test tell us about my diagnosis, treatment options or risk of developing other cancers?

How do I obtain a copy of these results?

Note: As a patient, you have the right to receive copies of all records related to your care.

How reliable is this test?

Does the test tell us about the stage of my cancer or whether it has spread?

Questions to Ask Your Doctor After Biomarker Testing

CANCER CHANGES EVERYTHING. CANCERCARE® CAN HELP.

Are there additional biomarker tests or other tests you would recommend?

Are there clinical trials available that might provide further treatment options? Where can I find more information?

Based on the results, is biomarker testing recommended for my family members?

Is there any other information I should know?
